## New Developments

### The New Primo Weigher!

WeighPack's newly designed PrimoWeigher is focused on clean-ability and service-ability.

The open skeletal frame design with rotating hopper assembly creates an un-clustered and accessible machine. Decontamination is a breeze. No areas of accumulation. Clean up has never been easier and more thorough.

#### Features include:

- Stainless steel construction
- Microprocessor control
- Tool-less disassembly
- Individual lane chutes
- Quick-release buckets & feed pans
- Adjustable & pivoting hopper

## Industry News

### Packaging Sustainability

Over the last year, there has been an increase in the demand for sustainable packaging.

According to the Sustainable Packaging Coalition, sustainable packaging is any type of packaging that is designed to optimize the materials and energy used to create it.

With concerns over the state of our environment and the practice of "going green" increasing daily, many companies are faced with the decision to alter their practices to embrace this new philosophy. In order to do so, many packaging manufacturers are offering customers "sustainable packaging systems" that aim to maximize the use of renewable and recycled materials.

## Customer NEWS

**Bakery on Main**, a granola company located in Glastonbury Connecticut, recently installed a WeighPack system to help them package their Ultra Premium Granola line.

Founded in 1992 by Mr. Michael Smulders, **Bakery on Main** has been producing quality granola products for over a decade now.

Previously packaging by hand, **Bakery on Main** met with an increase in demand for their products and decided in late 2008 that it was time to automate their operations.

They purchased a 10 head [Combiscale Combination Weigher](#), a [Swiftly 3600 Horizontal Bagger](#) for pre-made stand-up pouches and an [Incline Infeed Conveyor](#).

Producing up to 25 bags per minute, they now easily meet their orders and can continue to produce their great tasting granola product which are found in retail stores across the USA.

Visit [www.bakeryonmain.com](http://www.bakeryonmain.com) for further information on their products.
