

WeighPack Introduces new Horizontal Form Fill Seal – Swifty R2B

November 20, 2008 - WeighPack Systems Inc. (WeighPack) is pleased to launch its first HFFS machine, the Swifty R2B. Horizontal form fill and seal technology integrates bag making, filling, sealing, and printing in one automatic process thus increasing productivity and reducing labor and film costs.

Eliminating the need to purchase pre-made bags, the Swifty R2B uses laminated roll stock film to create a variety of different pouch styles including; flat-bottom, stand-up, 3-sided seal and 4-sided seal bags with or without zipper closures.

Designed to handle bag sizes ranging from 3" to 8" wide and from 4" to 11" long, the R2B runs with speeds of up to 120 bags per minute.

Easily interfaced with any type of filling equipment, the Swifty R2B HFFS bagger is ideal for bagging a variety of different products including all snack foods, hardware, coffee, produce, pharmaceuticals and much more.

About WeighPack Systems Inc.

With five international locations including; Chicago, Montreal, Las Vegas, Miami and Shanghai, WeighPack designs, manufactures and supplies a complete range of top quality weighing and packaging equipment to the food, chemical, pharmaceutical and hardware industries, offering customers single source responsibility with fully integrated systems, full support & after sales service.
